</tr>
<tr>
<td>Provide hedge against political risk</td>
<td></td>
</tr>
</tbody>
</table>
Chapter 3: Investment Alternatives

Investment in Unit Trust Funds

- Pools together funds so that investments can be made on an economic scale to purchase stocks, bonds and other investment instruments
- Provide benefit of diversification in the investment especially for investors with small capital
- Managed by professional fund managers
- Involves trust between:
  - Unit trust management company
  - The trustee (custodian) of all assets
  - Unit trust holders

Advantages and Disadvantages of Investing in Unit Trust Funds

**Advantages**
- Less risk
- Provides stable and steady returns
- Managed by professionals
- Good way to invest in stock market
- Good hedge against price volatility
- Can be a source or collateral

**Disadvantages**
- Lesser profit
- Unit holders are indirect investors
- No capital appreciation

Investment in Derivative Securities

- An investment in which the performance is determined by the performance of another instrument
- Value depends on the value of underlying instrument such as commodities prices, exchange rate, interest rate and share prices
- Examples include options, futures and warrants
Chapter 3: Investment Alternatives

Options

- Financial derivative/ equity derivative
- Are contractual instruments where two parties enter into an agreement to give something of value to another
- Options contract gives a holder the right to buy/ sell a certain amount of underlying financial asset at a specified price for a specified time period
- Owner of option is known as option purchaser/ holder and the seller is the option writer
- If option holder chooses not to buy/ sell the instrument, he or she can allow the option to expire

1. Call option
   - give holder right to buy, not the obligation to buy an underlying asset at specified number of shares at specified price within specified time
   - Valid for less than one year

2. Put option
   - Give holder right but not obligation to sell an underlying asset at a specified number of shares, at a specified price within a specified time period

Investing in Options

**Advantages**

1. Much smaller investment is needed
2. Loss may be known in advance
3. Provide large gains in relation to buying shares
4. Reduce risk
5. Able to participate in the movement of the market

**Disadvantages**

1. Must have expertise and knowledge to understand mechanism of trading in options
